DETAILED ACTIONS

Election/Restrictions

1. Applicant's election of Group I (Claims 1-13, 27) is acknowledge.

Claims 1-13, 27 are remained for examination. Accordingly, claims 14-26 are canceled/withdrawn from consideration as being directed to a non-elected invention.

See 37 CFR 1.142(b) and MPEP § 821.03.

Specifications

2. title "SYSTEM FOR ULTRAVIOLET **ATMOSHPERIC** SEED LAYER REMEDIATION", the "atmoshperic" should be --atmospheric--

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-13 are rejected under U.S.C 103(a) as being unpatentable over Background of Invention (BOI) in view of Schenck (4,317,041).

Regarding claims 1, BOI, (see figure 1, pages 2-6), teach a semiconductor processing module comprising: a housing adapted to enclose a semiconductor wafer 102

It is noted that BOI fails to teach an ultraviolet radiation (UV) source disposed within the housing; and a treatment medium disposed within the housing.

However, Schenck, (see col. 33, lines 46-67, col. 34, lines 1-67)), teach an ultraviolet radiation (UV) source disposed within the housing; and a treatment medium disposed within the housing.

Art Unit: 2818

Regarding claim 2, Schenck, see col. 9, lines 1-8, teaches the UV source comprises an UV lamp.

Regarding claim 3, Schenck, see col. 1, lines 42-50, teaches the treatment medium comprises ambient air.

Regarding claims 4, 5, Schenck, see col. 5, lines 50-55, teaches the treatment medium comprises oxygen, ozone.

Regarding claims 5-13, Schenck, see col. 5, lines 50-67, col. 6, lines 1-67.

It would have been obvious to one having ordinary skill in the art at the time of the present invention to apply the teachings of Schenck into the method of BOI as both are related to the same subject matter of applying an UV and a treatment medium disposed within the housing in an apparatus to remediate seed layer surface during fabricating a semiconductor device.

Allowable Subject Matter

4. Claim 27 is allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Kelada'735, Sitte'420, Schenck'383 are cited as of interest.

6. A shortened statutory period for response to this action is set to expired 3 (three) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see 710.02 (b)).
